## PROJECTS:

**TRELLOO**   *Ruby on Rails, VueJs, Heroku*

[live](#) | [github](#)

A Trello clone for managing todo list, or memo.

- A trello clone built as a responsive single page web application. User can add, delete, arrange cards and lists.
- Front-end made with HTML, CSS, and Vue.js, backend with Ruby on Rails and PostgreSQL
- Can be scaled with user authentication and authorization using devise gem.

**Hype News**   *Ruby on Rails, PostgreSQL, jquery, javascript, SCSS, Material, Heroku, Amazon S3*

[live](#) | [github](#)

A solelinks clone for taking new shoes release information.

- A web application that allows admin can CRUD new shoes release information. User can share their thoughts through comments.
- Front-end made with HTML, CSS, material UI and jQuery, backend with Ruby on Rails and PostgreSQL.
- Formatted image files can be uploaded with ActiveStorage, via Amazon S3.
- Full user authentication and authorization is implemented.

**My Portfolio**   *Ruby on Rails, PostgreSQL, jquery, javascript, SCSS*

[live](#) | [github](#)

My portfolio website for job searching.

- Responsive web application that is for my personal portfolio.
- Front-end made with HTML, CSS, Material UI, jQuery, backend with Ruby on Rails and PostgreSQL.
- Responsive web application based on scroll and reveal. Used only scss for practicing scss.
